

FLOOR PLAN

Scale: $\frac{1}{8}" = 1'-0"$

ELEVATIONS

Scale: $\frac{1}{8}" = 1'-0"$

NOTE:

When Building Or Enlarging A Confinement Swine System You Are Encouraged To Employ A Registered Consulting Agricultural Engineer. The Engineering Consultant Will Be Concerned With Providing The Best System Designed For Your Specific Needs.

TRUSS NOTES:

1. Pre-Fabricated Trusses With Metal Press-Plate Connectors May Be Used.
2. Apply Gussets On Both Sides Of Joint Except On End Trusses.
3. Drive One Half Of All Nails Listed From Each Side Of Joint.
4. Use Deformed-Shank High-Carbon Steel Nails.
5. Use Exterior-Grade C-C Plywood For Gussets.

JOINT	NAIL SIZE	MEMBER	NO. REQ'D	NO. PER TRUSS

-BOTTOM DISCHARGE EVAPORATIVE COOLER (INDUSTRIAL WEIGHT) WITH PADS ON 4 SIDES, 7,000 CFM (MINIMUM) FAN DELIVERY AT $\frac{1}{4}$ " STATIC PRESSURE

THERMOSTAT	TYPE	SETTING
Safety	Close On Rise	55 °F
Heater	Open On Rise	65 °F
Fan - Nominal	Solid State Panel	70 °F
Cooler Fan	Close On Rise	78 °F
Cooler Water Pump	Close On Rise	80 °F

HEATING OPTIONS— GROWER
 A: 100,000 Btu/Hr (Minimum) Gas-Fired Heater With A Fan Throw Of 20'-30'
 C: 2 - 40,000 Btu/Hr Electric Heaters With A Fan Throw Of 20'-30'

THERMOSTAT	TYPE	SETTING
Safety	Close On Rise	55 °F
Heater	Open On Rise	70 °F
Fan - Nominal	Solid State Panel	75 °F
Cooler Fan	Close On Rise	80 °F
Cooler Water Pump	Close On Rise	82 °F

HEATING OPTIONS— FARROWING
 B: 100,000 Btu/Hr (Minimum) Gas-Fired Heater With A Centrifugal Fan Capable Of Air Delivery At $\frac{1}{4}$ " Static Pressure
 D: 2 - 40,000 Btu/Hr (Minimum) Electric Heaters With A Fan Throw Of 50'-70'

HEATING PLAN

SYMBOLS & LEGEND

- Ceiling Mounted Duplex Outlet For Heat Lamps
- Duplex Outlet
- ⊗ Switch Controlled Outlet For Feed Augers
- ▬ Controlled Lighting - Farrowing
- ▬ Controlled Lighting - Grower
- Continuous Lighting

- Feed Augers
- Each Exhaust Fan
- Each Evaporative Cooler
- Heat Lamp Outlets (5 Duplex Outlets Per 20 Amp Circuit, Max.)
- Continuous Lighting & Gas Fired Heaters
- All Other Lighting & Convenience Outlets As Req'd

ELECTRICAL PLAN

- Since Only One Fan Serves Each Animal Space A Fan Failure Warning System Is Required & Should Be Monitored At All Times. A System Which Monitors Current In Each Fan Circuit Is Recommended Over One Which Monitors Voltage Only. The Warning System Should Activate A Battery Operated Bell At The Operator's Residence.
- A Stand-By Generator Capable Of Picking Up The Entire Electrical Load Is Recommended.
- The Building Foundation & Pit Walls May Be Formed By Trenching (As Drawn), By Forming, Or By Concrete Masonry Construction.
- Lining Material May Be Corrugated Metal Placed Longitudinally, Vertical Joints Caulked, As Drawn, Or Any Other Impact Resistant Material Which Will Not Be Damaged By High Pressure Water Cleaning.
- Building Should Be Adequately Protected From Lightning

Disclaimer

This site makes available conceptual plans that can be helpful in developing building layouts and selecting equipment for various agricultural applications. These plans do not necessarily represent the most current technology or construction codes. They are not construction plans and do not replace the need for competent design assistance in developing safe, legal and well-functioning agricultural building system. The LSU Agriculture Center, the Mid-West Plan Service, the United States Department of Agriculture and none of the cooperating land-grant universities warranty these plans.
