Physical Activity
Community Assets

2020

In 2018, the LSU AgCenter entered into a 5-year cooperative agreement with the Centers for Disease Control and Prevention (CDC) to address the nutrition and physical activity environments in six rural Louisiana parishes with some of the highest obesity rates in the state (Assumption, St. Helena, Tensas, Madison, Morehouse, and East Carroll). Through the LSU AgCenter's Cooperative Extension Healthy Communities initiative, multi-level, community-driven approaches are utilized to identify and implement Policy, Systems, and Environmental (PSE) change strategies, with the goal of promoting healthy behaviors among residents and improving obesity rates and quality of life.

Healthy communities are places where people come together to make their communities better for everyone through collaboration, community ownership, inclusive approaches, and a long-term, positive commitment to healthy lifestyles. The mission of Tensas Parish Healthy Communities is to improve the overall health of residents in Tensas Parish through policy, systems, and environmental changes. Tensas Healthy Communities works to improve physical activity and nutrition and reduce obesity for residents of Tensas Parish by utilizing systematic and sustainable strategies to implement change.

The following pages detail the strong network of resources, stakeholders, and community assets within Tensas Parish.

Asset Maps identify and provide information about a community's assets: the resources, knowledge, and skills that the community possesses.

Tensas Parish

Demographics

Tensas Parish Ranks **61** out of **64** parishes in terms of overall health.

31%

Obesity Rate

26%

Food Insecure

33%

Physically Inactive

The Healthy Communities cooperative agreement between the Centers for Disease Control and the LSU AgCenter utilizes economic development strategies to improve the local food system and physical activity environment.

As of 2020, the unemployment rate of Tensas Parish was **7.7%**, compared to the state average of **4.9%**, and **18%** of the parish population lacked health insurance.

53.9%

African American

42.6%

Non-Hispanic White

92%

Eligible for Free/Reduced Lunch

20.7%

Households Receiving SNAP

9.7%

Households with No Vehicle

85%

Lack Access to Exercise Opportunities

LSU AgCenter Healthy Communities Food Systems Assessment

Assessment Objective

To assess the current food system needs in six rural parishes (Assumption, Tensas, St. Helena, Madison, East Carroll, and Morehouse) supported by the LSU AgCenter's Healthy Communities initiative.

Key Findings

- All six parishes had an abundance of community assets related to the food system. More than one hundred food access points were identified across all six parishes as having the potential to expand or improve their offerings of healthier foods.
- A strong network of community growers and producers was identified in all six parishes.
- Food distribution sites (food pantries, commodity distribution sites, and prepared meal sites) were found to have a high need for equipment and supplies to facilitate procurement and stocking of healthier foods. In addition, a need for procuring more healthy foods was identified for food distribution sites.
- Local grocery stores had the strongest food environment in terms of available healthy foods. Dollar stores were considered an important food access point for residents but scored relatively low compared to groceries in terms of available healthy foods. Residents did not view corner/convenience stores as a viable option for purchasing food, especially when using SNAP.
- Residents often shop for food outside their parish due to poor quality and high prices in their parish, however, five of the six parishes experience higher rates of homes with no vehicle ownership than the state average. Only three of the six parishes were found to have on-demand public transit.

Recommendations

Enhance capacity of food distribution sites to enable procurement and storage of healthier items such as fresh produce, lean meats, and low-fat dairy.

Connect food pantries with local producers identified in each parish. Introduce policies to ensure the sustainability of partnerships.

Implement client choice models and/or nutrition standards at food distribution sites to improve access to and sustainability of healthful foods.

Expand SNAP acceptance at local food outlets already selling fresh fruits and vegetables, such as farmer's markets and produce stands.

Target local grocery stores for healthy retail initiatives focused on connecting local producers to food retailers and making the healthy choice the easy choice for customers.

Increase ridership and awareness of available on-demand transportation services to improve community-wide access to available healthy foods.

Establish local and/or regional food policy councils to connect key food system stakeholders and ensure the sustainability of access to healthy foods in the community.

Policy and Programs Score 25%

Town Policies

Town has a policy requiring bikeways/pedestrian walkways in new public infrastructure projects.

0/10

0/10

Town Programs

Town has a public recreation department.

0/10

Town has a private recreation organization (e.g. YMCA)

0/4

Either public or private department/organization (or both) offers physical activity programming for youth.

0/4

Either public or private department/organization (or both) provides scholarship/sliding fee scale for lower income residents.

0/4

There are organized transportation options (either public or private) that help children get to/participate in physical activity opportunities.

0/4

Public or private department/organization (or both) allows resources/facilities to be available for local resident use outside of programming.

0/4

0/30

School Policies

Schools in the town allow public access to their recreation facilities after school hours.

0/15

Public Schools offer a late-bus option for children that stay after school for sponsored activities.

15/15

15/30

School Programs

There are "Walk to School" programs or other programs that encourage children to walk or bike to school.

0/15

Schools are participating in other activities (excluding "Walk to School" programs) that are included in the National "Safe Routes to School" program.

0/5

Schools offer other sponsored physical activity initiatives for students (do not include gym/phys-ed classes).

Use your Asset Map as a resource when considering advocacy and policy in your community. Asset Maps highlight the availability or lack of community assets, and they can serve as a powerful tool when trying to make a case for needed policy, locally or on a state level.

Louisiana Obesity Prevention Standards and Legislation

Policy Type	Policy #	Policy Description
	HCR 150	Directs the Department of Social Services to assess efforts in Louisiana to promote healthy food choices among recipients of Supplemental Nutrition Assistance Program
	HCR 231	Requests the Office of Group Benefits to conduct a study on the financial benefits of establishing a program to address the high rate of obesity in Louisiana.
	Act 388	Aims to stimulate investment in healthy food retail outlets in underserved areas and to combat food deserts by insuring everyone has access to fresh fruits and vegetables.
	Act No. 252	Healthy Food Retail Act to stimulate investment in healthy food retail outlets in underserved areas. Program created in the Department of Agriculture and Forestry and currently not funded.
	ACT 306	Amended 2005 Act 331, School Vending Bill, to provide that 100 (previously 50%) of beverages sold on high school campuses adhere to healthy guidelines.
	SCR 94	Requests the Department of Agriculture and Forestry and the Department of Education to implement a Farm to School Program and to assist schools with local procurement options for fresh fruit, vegetables, meats, and seafood.
	SCR 96	Requests the Department of Health and Hospitals and the State Board of Elementary and Secondary Education to submit jointly a report to the legislature regarding the availability of water for student consumption at elementary and secondary schools.
	HB 1	Among other items, sets standards for nutritious meals. The bill sets performance indicators for the School Food and Nutrition Program and for child and adult care food and nutrition activities to ensure that nutritious meals are served to children.
	HB 193	Authorizes the Board of Elementary and Secondary Education to promulgate rules and regulations to implement U.S. Department of Agriculture nutrition programs. The bill requires the Department of Education to implement the nutrition programs pursuant to such rules and regulations. It allows the department to conduct studies regarding methods of improving and expanding nutrition programs and promoting nutritional education in the schools, and also authorizes the department to conduct appraisals of the nutritive benefits of nutrition programs and report its findings and recommendations to the governor.

	HB 767	Revises nutrition standards for beverages sold in public high schools. The bill states that beverages offered for sale to high school students will be comprised of bottled water; no calorie or low-calorie beverages that contain up to 10 calories per eight ounces; up to 12-ounce servings of beverages that contain 100 percent fruit juice with no added sweeteners and up to 120 calories per eight ounces; up to 12 ounce servings of any other beverage that contains no more than 66 calories per eight ounces; or low-fat milk, skim milk and non-dairy milk. It requires that at least 50 percent of non-milk beverages be water and no-calorie or low-calorie options that contain up to 10 calories per eight ounces.
	SB 299	The Healthy Food Retail Act requires the Department of Agriculture and Forestry to establish a program that provides grants and loans to healthy food retailers that increase access to fresh fruits and vegetables and other affordable healthy foods in underserved communities. The program can finance new grocery store construction and renovations, farmers' markets and public markets; and food cooperatives, mobile markets and healthy food delivery projects. Applicants must demonstrate that they will sell fresh fruits and vegetables in underserved communities, especially to SNAP and Special Supplemental Nutrition Program for Women, Infants and Children (WIC) participants.
	HCR 209	Requests the Board of Elementary and Secondary Education to study the feasibility of increasing PE units required for high school graduation.
	Act No. 256	Provides for health-related fitness assessments to determine physical fitness levels of students in schools. Review of current pilot program using Fitnessgram with intent to expand statewide.
	Act 180	Requires the Department of Education to hire a Health and Physical Education Coordinator who will be responsible for the development, implementation, and monitoring of health and physical education curricula in all public elementary and secondary schools in the state.
	Act 734	Physical fitness and nutrition of students. Establishment and implementation of a pilot program and School Health Awards for outstanding program of physical activity. Public schools, grades K-6, provide 30 minutes each school day of quality, moderate to vigorous physical activity.
	ACT 286	Requires physical activity for students (K-8, at least 30 min per day) and establishment of School Health Advisory Councils in each city, parish and other local public school board.
	ACT 351	Provides that elementary, secondary, or charter schools that enter into a joint-use agreement do not incur any liability for injuries to persons or property. Joint use agreements expand access to playgrounds, gymnasiums, and tracks that are already located within communities

	SCR 95	Requests the Department of Education to issue a report as to the number of joint-use agreements in place throughout the state and include a plan to promote the use of such agreements.
	SB 309	Provides for health-related fitness assessments to determine physical fitness levels of students in schools to reduce childhood obesity, including baseline measures of fitness and body mass index and measurement of the effectiveness of interventions. The bill expands a pilot program to provide statewide implementation focused on school systems with high poverty levels.
	HB 400	Requires public schools to provide at least 30 minutes of physical activity each school day for students in grades seven and eight. The bill also requires each city, parish and local school board to establish a local school health advisory council, the members of which shall be appointed by the school board.
	Bulletin 741	Requires students in grades 1-8 to receive 150 minutes of physical education per week. Allows an approved Junior Reserve Officer Training Corp program to be substituted for the 2 credits of health and physical education upon board approval. This code further allows students to be exempted from this requirement for medical reasons only, but the number of credits required for graduation remains at 23.
	RS 17:17.1	Requires each elementary and secondary school to provide improved physical activity and fitness in schools by encouraging innovative physical education programs.
	Bulletin 741	Requires 1.5 units of physical education for public high school graduation. In The Louisiana Handbook for Nonpublic School Administrators (2005), requires 2 units of health and physical education for non-public high school graduation.
	RS 17:276	Requires each public secondary school to offer, as part of the physical education program, sexually segregated contact sports and sexually integrated noncontact sports with the options for students to choose either or both.
	RS 17:1941	Requires school districts to make available physical education services, specially designed if necessary, to every student with a disability receiving a Free and Appropriate Public Education (FAPE). It also requires schools to make available specially designed physical education (Adapted Physical Education) for students with disabilities as prescribed in the student's Individual Education Program (IEP).
	Bulletin 102	Outlines state Physical Education Content Standards (2009). The standards document also serves as a suggested curriculum framework, although local schools are not required to adhere to it.
	RS 17.17.5	Provides for health-related fitness assessments to determine physical fitness levels of students in school. The bill expands a pilot program to provide for statewide implementation focused on school systems with high

		poverty levels.
	Act No. 147	Provides for bicyclists and vehicle safety.
	SCR 110	Requests formation of a complete streets work group in the Department of Transportation and Development that will develop complete streets guidelines that will apply any time state or Federal funds are used to build a roadway or bridge.
	SCR 77	Requests the Department of Health and Hospitals (DHH) and DOE to examine the adequacy of current practices for ensuring preventive health and well-being of adolescents in Louisiana.
	ACT 288	Provides for the establishment and administration of a targeted coordinated school health program for the purpose of reducing childhood obesity and a grant program to assist public school governing authorizes with implementation.
	HB 538	Creates the Agricultural Products Processing Development Fund to support development and enhancement of processing raw agricultural products by providing loans to eligible facilities through the Louisiana Agricultural Finance Authority.
	HB 358	Provides that elementary, secondary, or charter schools that enter into a joint-use agreement do not incur any liability for injuries to persons or property. It does not exclude liability for gross negligence or willful and wanton misconduct. Provides that the school executing a joint-use agreement shall require the other party to maintain and provide proof of insurance coverage. Provides much needed clarification and will expand access to playgrounds, gymnasiums, and tracks that are already located within communities.
