Department of Plant Pathology and Crop Physiology			Faculty of Agronomy and Biology: Departments of Botany and Micro-biology
Vinson Doyle , PhD, Associate Professor (on sabbatical as of Aug 2022)	578-4052, vdoyle@agcenter.lsu.edu	Fungal systematics & population genetics; fungal taxonomy; plant-associated fungi; bioinformatics; statistical phylogenomics; phylogenetic methods • Leveraging technical and methodological advances to ID processes that shape plant-associated fungal diversity. • Better understanding of fungal diversity, particularly of endophytic, epiphytic, and plant pathogenic fungi. • Methodological phylogenetics research to address questions of fungal evolution.	Department of Botany, Faculty of Agronomy & Biology: Molecular and ultrastructural responses of plants to plant-associated fungi: Dr. E. Muszyńska (ewa_muszynska@sggw.pl), Dr. M. Sujkowska-Rybowska (margareta_sujkowska@sggw.pl). Molecular and structural responses of plants (model species and crops) to beneficial microorganisms: Dr. B. Łotocka (barbara_lotocka@sggw.pl), Dr. W. Borucki (wojciech_borucki@sggw.pl), Dr. M. Sujkowska-Rybowska, Dr. M. Bederska-Błaszczak (magdalena_bederska@sggw.pl). Ewa Gorska: e.b.gorska@wp.pl, ewa_gorska@sggw.edu.pl: Diversity of microorganisms in agricultural and forest soils using classical micro-biological analyses and meta-genomic analyses
Jong Ham , Professor	578-6798, jham@agcenter.lsu.edu	• Phytobacteriology • Disease Control • Genetics	Ewa Górka: e.b.gorska@wp.pl , ewa_gorska@sggw.edu.pl : Diversity of microorganisms in agricultural and forest soils using classical micro-biological analyses and meta-genomic analyses
Department of Experimental Statistics			Faculty of Applied Informatics and Mathematics; Faculty of Agronomy and Biology, Department of Experimental Design and Bioinformatics
Brian Marx , PhD, Professor,	578-8366, bmarx@lsuagcenter.lsu.edu	• Penalized B-spline smoothing: P-splines • Signal Regression and Chemo-metrics	Karol Bronisz (Faculty of Forestry, Laboratory of Dendrometry and Forest Productivity) Karol.Bronisz@wl.sggw.pl Application of Mixed models in forestry, e.g: Biomass mixed models, taper mixed models

¹ If a name of an LSU AgCenter faculty member is colored and underlined then, in a digital version of this document, that name is a web-link to the faculty member's web page.

² Unless otherwise specified, all phone numbers are preceded with the US country code of 1 and the Baton Rouge, LA area code of 225.

Name/Unit ¹	Contact Info ²	Research Areas	
		- Varying Coefficient Models - Generalized Linear Models, Generalized Additive Models - Ill-Conditioned Data, Biased Estimation, Penalized Likelihood - Generalized Estimating Equations	Application of GLM & GAM in forestry
Bin Li , PhD, Associate Professor	578-1343, bli@agcenter.lsu.edu	- Statistical learning and data mining. - Data analysis on high-dimensional data. - Statistical modeling in soil data analysis. - Spatial data analysis. - Statistical computing.	Jakub Paderewski (j.paderewski@omega.sggw.waw.pl), Department of Experimental Design and Bioinformatics: My topic is PCA analysis. I'm trying to develop the AMMI analysis, which is in fact the SVD decomposition of the Genotype-by-Environment interaction effects. I use this analysis for more than two factors datasets. I'm interested in similar techniques, for example non-metric multidimensional scaling, cluster analysis and heatmap, or n-mode Tucker decomposition. I use R language now. https://scholar.google.com/citations?user=h6FiYrEAAAAJ&hl=en . I'm also interested in simulation studies and development of statistical tests (also based on permutation methods).
School of Renewable Natural Resources Louisiana Forest Products Development Center Aquaculture Research Station (ARS)			Faculty of Forestry: Departments of Forest Utilization, Forest Management, Forest Economics Faculty of Wood Technology: Department of Mechanical Wood Processing Faculty of Civil and Environmental Engineering
Sun Joseph Chang , PhD, Professor	578-4167, schang@agcenter.lsu.edu	Forest Management, Forest Economics, and Log Sawing Optimization	Michał Zasada (Michal.Zasada@wl.sggw.pl) – Forest management, forest G&Y modeling Arkadiusz Gruchała (Arkadiusz.Gruchała@wl.sggw.pl) – Forest Economics
Bret Collier , PhD, Assistant Professor	578-4131, bcollier@agcenter.lsu.edu	- Wildlife population ecology focusing on sampling design and parameter estimation of mammal and bird populations - Spatial modeling and statistical & computational ecology topics - Game species, especially wild turkeys	Dr Krzysztof Klimaszewski Krzysztof.klimaszewski@sggw.pl Faculty of Animal Sciences, Division of Zoology

LSU AgCenter			SGGW
Name/Unit ¹	Contact Info ²	Research Areas	
C Greg Lutz , Professor, ARS	+1 225 223-0371, +1 225 765-2848, glutz@agcenter.lsu.edu	Quantitative genetics, alternative species commercialization, practical genetic evaluation through field trials	
Kevin Ringelman , PhD, Assistant Professor	578-4212, kringleman@agcenter.lsu.edu	• Intersection of animal behavior, ecology, and conservation • North American waterfowl	Dr Krzysztof Klimaszewski Krzysztof klimaszewski@sggw.pl Faculty of Animal Sciences, Division of Zoology
Richard Vlosky , Ph.D., Professor	578-4527, RVlosky@agcenter.lsu.edu	• Value-added product business opportunities • Technology applications to improve business competitiveness • Strategic positioning • Marketing applications to economic development environmental certification and marketing • eBusiness, eCommerce • Domestic and international wood products marketing and business development • Biofuels, Bioprocessing, Wood-based Bioenergy and Biomass	Tomasz Zielenkiewicz (tomasz_zielenkiewicz@sggw.pl) (Biofuels, Bioprocessing, Wood-based Bioenergy and Biomass, Instrumental Analysis of Wood and Biomass, Dendrochemical Analysis of Heavy Metals Originated from Environmental Pollution)
Quiglin Wu , PhD, Professor	578-8369, quwu@agcenter.lsu.edu	• Wood/natural fiber polymer composites, biomaterials from natural polymers, composite durability, engineering performance, and nano-composite materials. • Nanocellulose and its applications • Lost circulation control materials	Dr Marek Klimkiewicz marek klimkiewicz@sggw.pl Department of Production Organization and Engineering

LSU AgCenter			SGGW
Name/Unit ¹	Contact Info ²	Research Areas	
		- Natural fiber reinforced plastic composites – coextrusion processing - Dimensional stability and durability of wood-based composite	
Yi Jun Xu , PhD, Professor	578-4168, yjxu@agcenter.lsu.edu	- Hydrologic & biogeochemical processes and modeling - Riverine nutrient and sediment transport - Hydrology and flood risk under changing land use and climate - GIS/RS applications in water resources	Prof. Kazimierz Banasik (Kazimierz_banasik@sggw.pl) – Faculty of Civil and Environmental Engineering
School of Plant, Environmental and Soil Sciences (and Louisiana Cooperative Extension Service)			Faculty of Agronomy and Biology Faculty of Horticulture, Biotechnology and Landscape Architecture
Niranjan Baisakh , Ph.D., Associate Professor	578-1300, NBaisakh@agcenter.lsu.edu	- Plant (a)biotic stress - Molecular biology - Functional genomics - Genetic engineering - Tissue culture and di-haploid breeding	Department of Botany, Faculty of Agronomy and Biology - Molecular and ultrastructural responses of plants (model species and crops) to biotic and abiotic stresses (heavy metals/fungi: Dr. E. Muszyńska (ewa_muszyńska@sggw.pl), Dr. M. Sujkowska-Rybowska (marzena_sujkowska@sggw.pl); root parasitic nematodes: Dr. M. Sobczak (mirosław_sobczak@sggw.pl), Dr. M. Górecka (mirosława_gorecka1@sggw.pl); mite-induced galls: B. Łotocka (barbara_lotocka@sggw.pl), M. Górecka; light: Dr. W. Czarnocka (weronika_czarnocka@sggw.pl). - Molecular and structural responses of plants (model species and crops) to beneficial symbiotic microorganisms: Dr. B. Łotocka, Dr. W. Borucki (wojciech_borucki@sggw.pl), Dr. M. Sujkowska-Rybowska, Dr. M. Bederska- Błaszczak (magdalena_bederska@sggw.pl). - In vitro selection for heavy metals tolerance and multiplication of metallophytes: Dr. E Muszyńska.
